## TOXICOLOGY TESTING

A High Complexity CLIA and COLA certified laboratory, Genics Laboratories utilizes the most advanced and precise equipment and technology available.

Rapid 24-72 hr turn around time allows for the most prompt patient care.

### MEDICATIONS DETECTED

The opioid epidemic and the increased misuse of both prescription and illicit drugs have been on the rise leading to a rapid growth in toxicology testing. Today, toxicologists play a vital role in helping to maintain the integrity of the healthcare industry, protecting patients and doctors alike.

#### How accurate and reliable are Genics Results?

Genics Laboratories uses the state of the art technology – liquid chromatography/tandem mass spectrometry LC/MS to provide fast, accurate and reliable results.

The LC/MS instrument allows to simultaneously detect and quantify numerous medications and substances in a single analysis with pin point accuracy and practically no chance of false positive results. This allows to provide a better patient care and safer use of prescription medications.

#### Who can utilize Toxicology Testing?

- Pain Management and compliance testing
- In-patient or out-patient drug treatment facilities
- Juvenile group home patient monitoring
- Medically necessary testing (pre-surgery, toxicity/overdose cases, etc.)

#### List of Medication/Substances:

- |                      |                  |
|----------------------|------------------|
| • Amphetamine        | • Alcohol        |
| • Benzodiazepines    | • Methadone      |
| • Illicits           | • Sedatives      |
| • Opiates: Natural   | • Fentanyl       |
| • Opioids            | • Tramadol       |
| • Illicit: Synthetic | • Buprenorphine  |
| • Anticonvulsants    | • Antipsychotics |
| • Muscle Relaxants   | • Stimulants     |
| • Antidepressants    | • Meprobamate    |
| • Barbiturates       | • Cannabis       |
